Holistic hygiene at the highest level.

Good hygiene does not tolerate any compromises. Because today we all expect a safe, intelligently planned and at the same time pleasant washroom experience outside of our own homes – in small or large premises, in everyday working situations and educational surroundings as well as on the road.

We at Satino by WEPA enable you to meet these high expectations and set new standards in hygiene. Because we don't make any compromises either when it comes to hygiene. From hygiene papers to dispenser systems, from sanitisers and soaps to washroom accessories, our innovative products make an impression with their efficiency and sustainability, and inspire thanks to design and convenience. And their development is founded on scientific findings that make day-to-day hygiene even safer.

We think about the details while keeping the big picture in mind. In this way, we ensure premium, sustainable hygiene experiences perfectly matched to the respective requirements and optimally tailored to the wishes of your customers.

Our product lines: Hygiene paper to meet all requirements

We at Satino by WEPA know about the different needs of your customers. Which is why we offer our hygiene papers in five different product lines, with perfect solutions to meet all requirements. Only in this way is it possible to transform every washroom into a comfort zone truly for everyone involved.

Satino wepa *Prestige*

Our super soft hygiene products made of fresh fibres.

Satino wepa *Comfort*

The original – made of 100% recycled paper and our most popular hygiene product.

Satino wepa *Smart*

Smart, innovative grades in optimised sizes.

Satino wepa *Liquify*

The most reliable hygiene paper for preventing clogged pipes – dissolves extra quickly and safely.

Satino wepa *PureSoft*

The first premium hygiene paper made of 100% recycled cardboard. Super soft and especially absorbent, unbleached and incomparably environmentally friendly.

Satino wepa *GreenGrow*

The innovative premium product line made from alternative raw materials and Miscanthus, one of the most sustainable fresh fibres.

satino wepa GreenGrow

The innovative premium product line

made from alternative raw materials and miscanthus – one of the most sustainable virgin fibers.

By using miscanthus, we choose a locally sourced cellulose fiber; this plant is a future-proof and sustainable alternative for producing toilet and hand towel paper. Recycled paper streams also remain an important raw material.

With Satino GreenGrow, we now present an innovative combination of sustainable, responsible raw materials brought together in a premium product line. Satino GreenGrow is produced without harmful chemicals, is safe for people and the environment, Cradle to Cradle Certified® Silver, and climate-neutral thanks to 100% green electricity and the compensation of unavoidable production emissions through Gold Standard projects.

satino wepa PureSoft

The new generation of recycled paper: Satino PureSoft

PureSoft from Satino by WEPA is a raw material sensation: The new hygiene paper of the future in outstanding quality for your sustainable washroom. 100% recycled – made from cardboard.

Satino PureSoft is unbleached, luxuriously soft, especially absorbent and hygienically safe in all areas of application, from paper towels and toilet paper to kitchen rolls, tissues and cosmetic tissues.

Satino PureSoft is the result of intensive research and advanced paper technology at WEPA – and represents a milestone in the development of environmentally friendly premium fibres. Its innovative manufacturing process makes PureSoft one of the softest natural-coloured papers in the market.

Awarded with:

Award-winning quality. Awards for Satino.

HYGINITY is honoured with the German Design Award 2025 in the category “Excellent Product Design – Medical, Rehabilitation and Health Care”.

HYGINITY is honoured with the “2024 European Product Design Award” in the category “HOME (Household Products/ Bathroom): Sanitary Equipment”.

According to the German Environment Agency, the biggest innovation in the paper segment for more than a decade*:

Satino PureSoft won the Federal Ecodesign Award 2023 in the Product category – the highest honour for ecological design in Germany.

An award with Europe-wide acclaim: Satino by WEPA received the **European Cleaning & Hygiene Award 2024** in the Sustainability – Best Practice (Manufacturer) category. We are thus setting benchmarks for the entire industry – also thanks to Satino PureSoft.

* Dr. Bettina Hoffmann, Parliamentary State Secretary at the Federal Ministry for the Environment)

Responsible sustainability

Our path as a forward-looking family business

Since being founded in 1948, the WEPA Group has been a family-run company with a clear focus on sustainability. The concept of sustainability is firmly anchored in our corporate culture and is an integral part of our corporate strategy. This is also highlighted for example by various environmental labels.

With a holistic approach, we bring together economic, environmental and social aspects and ensure transparency in both our business activities and the entire value chain. We are aware of the impact our actions have on the world of tomorrow and we assume responsibility – for our future and that of future generations. As part of this, we go beyond compliance with legal requirements. Our business activities are guided by our ethical values and standards. Sustainability is the foundation of all our business activities and investments, and therefore the decisive precondition for achieving our ambitious sustainability goals. More detailed information can be found in the WEPA Sustainability Reports.

Find out more about sustainability at WEPA

Our vision for sustainable packaging

With the circular economy as our guiding principle, we consistently drive forward our packaging strategy. In the short term we focus on optimising plastic packaging by reducing the amount of material and increasing the share of recycled plastic. Our long-term objective: fibre-based packaging from 100% recycled fibre. By doing without plastics we minimise the impact on the environment and use materials that pose the lowest risk for polluting the soil and oceans – and also have excellent recyclability.

Our certifications

A plus for the environment, a plus for your sales – for example in tenders for public bodies.

- **FSC®-C016151 and PEFC/04-32-0775:** for all WEPA locations as well as for pulp and recycling products. Only items marked with FSC® are actually certified.
- **Blue Angel:** for selected products from recycled fibre
- **EU-Ecolabel:** for our pulp and recycling qualities
- **ISO 9001, ISO 14001 and ISO 50001:** all WEPA production sites in Europe
- **IFS Household and Care certification:** selected WEPA locations
- **Cradle to Cradle**

Simple operation. Attractive design.

The future of hygiene
is curved.

Design meets performance and user-friendliness: The HYGINITY range of dispensers sets new standards regarding functionality – and is the sustainable solution for maximum hygiene requirements*. HYGINITY dispensers are available in black and white for a suitable washroom ambience.

The innovation with users in mind

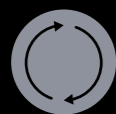

Developed by leading designers and microbiologists, the HYGINITY dispenser range sets new standards in the hygiene industry and puts people at the centre. It stands for revolutionary simplicity and cleanliness for the benefit of all – ranging from wholesalers and service personnel to decision-makers and end users. The range focuses on an intuitive design that results in user-friendly, time-saving and easy-to-install solutions for washrooms.

For sustainable washroom solutions

From private offices to large public facilities – the HYGINITY range of dispensers focuses on sustainability for every requirement. A high level of recycled ABS and recyclability are just as important as consumption right down to the last sheet. HYGINITY is the hygiene solution from Satino – more flexible and simpler than ever.

*Accenture Industry X Consumer Study 2024

The advantages: this is what HYGINITY stands for.

100%
recyclable

Tough, impact-resistant and
hygienic: easy to clean.

Supplied in a robust box
suitable for parcel shipping

Made from durable ABS plastic,
in black from recycled ABS

Temperature-resistant up to
approx. 95°C

Lockable/configurable locking
system

In black and white

Illustrated, self-explanatory
instructions for use

Flexibly mounted
via a mounting plate

All product highlights at a glance.

01

Ease of use

Intuitive operation. Designed for
easy use by users, maintenance staff
and installers.

02

Sustainability

Sustainably designed for
durability and efficient dispensing
that conserves resources.

03

Hygiene

Developed in collaboration
with microbiologists to ensure
increased hygienic safety.

04

Intuitive design

One of Europe's most aesthetically
appealing designs, crafted to enhance
the appearance of any washroom.

05

360° filling level indication

An improved display of the filling level
due to 360° transparent window.

06

Smart-ready

The dispensers can be upgraded
with sensors to be future-proof and
digitally-connected.

Easy Handling

Rapid installation, flexible mounting and simple refilling

Quick and precise mounting thanks to the standardised Satino with integrated spirit level – backwards compatible with already installed mounting plates. With the new click system, HYGINITY dispensers are simply clicked into the mounting plate without tools. Flexible placement: depending on their accessibility and handling, the dispensers can be opened upwards, downwards or to the side.

The modular design and the spare parts shop simplify repairs, e.g. in cases of vandalism.

01

02

The functions – simple and intuitive.

01 Easy detection of the fill level

Improved display of the fill level via an all-round transparent window and easier visual visibility.

02 Effortless opening with soft-opening technology

Optimum opening either upwards or downwards depending on the dispenser – for more flexible placement in washrooms. The integrated door stopper and soft opening make it easier to refill with hygiene paper.

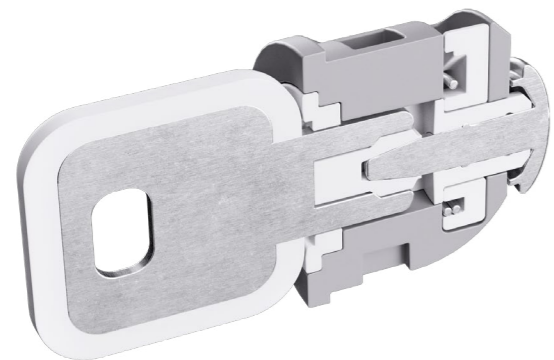

03 3-option lock

All dispensers can be opened with a unique, identical HYGINITY key. To close, simply press on the cover and the dispenser closes automatically. The new HYGINITY key is backwards compatible with all Satino by WEPA dispensers.

03

04

04 Permanent Satino key

Optionally, the HYGINITY key can stay in the dispenser for permanent opening and closing. For this function, simply insert the “permanent key”. Lock from the inside with a push button – the key clicks into place – done!

You'd like to turn a permanent lock back into a “standard lock”? This is also easy with the patented lock system.

The plus for hand hygiene: Paper towels by Satino

Water, soap and paper towels: the trio for effective, day-to-day hand hygiene. Drying your hands after washing is essential – not least because any remaining germs can thrive and multiply on damp hands.

Multiple reasons speak in favour of paper towels

A survey revealed:

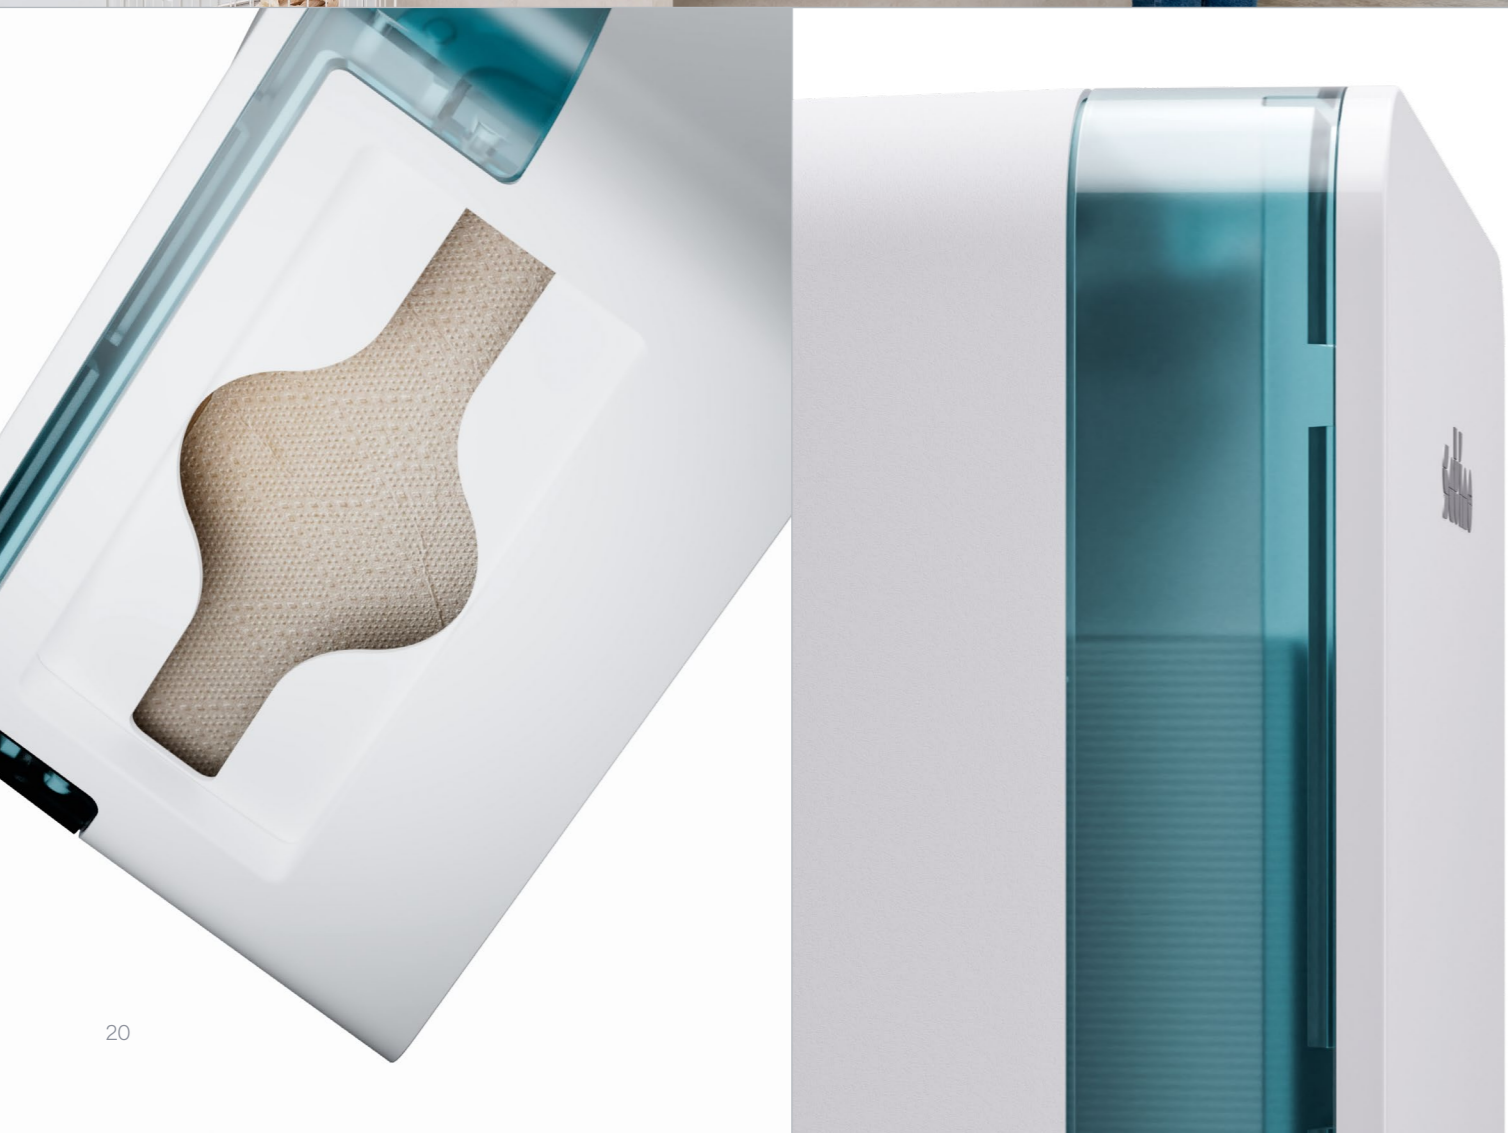

Hand towels are the most popular method of drying hands.

Studies verify:

Hand towels are the most hygienic way to dry hands. This is because paper towels come out of the dispenser clean and are only used once. Germs that were still clinging to damp hands are removed by friction during drying; airflow dryers, on the other hand, swirl remaining microorganisms from the hands into the room and onto surfaces.

Practice shows:

Paper towels are versatile. If needed, they can be used to turn off the tap, operate the door handle or simply absorb spilled liquids. Whatever the case, they end up in the waste and are then disposed of professionally.

Towel rolls

SYS1 Compatible

The sensor towel dispenser

for touch-free towel dispensing. The individually adjustable delay interval and sheet lengths from 20 to 34 cm reduce consumption and operating costs in the long term. Paper feed is either automatic or on demand. Both dispensers have a leftover roll function. They are also even quieter and more energy efficient.

Towel paper

Format C- & V-fold

PT3 Compatible

Satino folded paper towels with a V-fold and C-fold – all-rounders that make an impression in every version, featuring EU Ecolabel, FSC® Mix or Blue Angel certification. The highlights: high environmental friendliness, best recycled or cellulose quality, optimum cost-efficiency and proven cleaning and absorbency power. Packaging with practical handle.

Folded towel dispenser XS

The Satino folded towel dispenser XS with a practical filling level window: a great choice for smaller washrooms or low visitor frequencies – e.g. in doctors' surgeries, kitchens and classrooms. The maximum towel width is 25 cm.

FemCare dispenser

FC1 Compatible

Today, menstrual products such as tampons and sanitary pads are just as much a part of washrooms as water, soap and hand towels. The new 3-in-1 solution for feminine hygiene products is an all-rounder: it takes hygiene bags, up to 30 pads and 160 tampons in a single, compact dispenser.

Blue Atlantic

After a fresh, verdant prelude, floral scents flatter the senses while aromatic undertones ground them.

Top notes: fresh, green / aldehydes
Heart notes: floral / jasmine, rose, green apple
Base notes: spicy / patchouli, wood, musk

White Mountain

Citrus freshness with notes of orange, a floral, fruity middle and aromatic sweetness.

Top notes: lemony-fresh / orange, citrus
Heart notes: florally fruity / green apple, rose, violet
Base notes: spicy-sweet / vanilla, moss, sandalwood

Orange Desert

A refreshing experience with floral hints and dark, sensually oriental zest.

Top notes: fresh / bergamot, mandarin, orange
Heart notes: floral / green tea, jasmine, magnolia, rose
Base notes: aromatically sensual / white musk, cedarwood, sandalwood

Now that's clever Hygiene in a box

If the demand for hand hygiene suddenly increases, the recyclable Satino by WEPA towel dispensers are a perfect solution: be it at home or in public, as a mobile supplement or an eco-friendly alternative to dispensers made of ABS, metal or stainless steel.

But even where towels, hand dryers or towel dispensers are available: what can be done when there's a sudden, temporary increase in demand for hand hygiene? When companies, authorities, clubs or schools intend to ensure that everything's sanitary? When more people than usual are present at future company events, family celebrations or other occasions?

Satino by WEPA has devised a clever solution for precisely such cases: Hygiene in a box – the new, recyclable towel dispensers which are not only eco-friendly but also immediately ready for use wherever they're needed.

The cardboard dispensers can be attached using the integrated adhesive tape or screws; boreholes are already laid out. And if you do decide after all to go with a conventional dispenser: the drill holes are identical to those of the ABS dispensers from Satino by WEPA: outstanding cleaning results thanks to high absorbency and strength in 100% recycled quality. EU Ecolabel certified.
