satino wepa

Holistic hygiene that feels good.

Good hygiene permits no compromises. After all, we expect a safe, thoughtful, and at the same time pleasant hygiene experience everywhere people gather – in offices, healthcare, public spaces, in daily work and learning environments, or while traveling.

Satino is the brand for exactly this expectation. We offer comprehensive, high-quality hygiene solutions for all industries – with sustainable, safe, and innovative products and services that make everyday life noticeably more pleasant. We thus create high levels of safety and well-being.

From hygiene papers to soaps and sanitisers, and from dispensers to suitable accessories and additional services, we connect everything into holistic solutions from a single source. This creates washrooms that not only meet expectations but exceed them – and ultimately leave you with what truly matters: hygiene that feels good.

A Brand. The new Satino.

Satino is the professional hygiene brand of WEPA Professional – one of the leading european specialists for sustainable and integrated hygiene solutions.

Since 2026, Satino and BlackSatino will appear together under one name: Satino. This combines performance, sustainability, expertise and innovative strength into a clear, strong brand.

For you this means:

- a brand with a clear focus
- a modern, contemporary appearance
- a strong, simple portfolio
- bundled expertise and competence

Along with brand consolidation, the product range has also been restructured: clearer, systematic, and consistently oriented towards professional requirements.

Proven solutions from both brands remain available and are reflected in a clearly structured portfolio – for more clarity and simple hygiene.

Our product lines: hygiene paper for every requirement.

Every industry and application has different requirements for hygiene. Our product ranges thus offer hygiene papers that provide tailored and optimal solutions for every need.

Satino PureSoft

The 100% recycled and high-quality hygiene paper made from cardboard. Supersoft, convincingly absorbent, unbleached, and particularly environmentally friendly.

Satino GreenGrow

The innovative product line made from alternative raw materials and miscanthus grass – one of the most sustainable fresh fibres.

Satino HiLine

Our high-quality hygiene paper made from fresh fibres: particularly soft and ideal for areas where bright white papers are required. Made from pulp from sustainable forestry.

Satino HiCycle

Our 100% recycling product line combines cost-effectiveness, sustainable recycling properties and high quality. Suitable for many industries and hygiene requirements.

Satino Liquify

The reliable hygiene paper against pipe blockages – dissolves rapidly and highly safe.

Satino GreenGrow

Made from grass fibres.

Soft, absorbent, and reliable: Satino GreenGrow is the innovative hygiene paper made from miscanthus grass, which grows directly in Western Europe.

By using miscanthus grass, we choose a local cellulose fibre; the plant is a future-proof and sustainable alternative for the production of toilet and towel paper. Furthermore, waste paper streams remain an important raw material. With Satino GreenGrow, we now present an innovative combination of sustainable, responsible raw materials bundled in one product line.

Satino GreenGrow is produced without harmful chemicals, is safe for humans and the environment, certified according to Cradle to Cradle Certified® Silver, and CO₂ neutralized through the use of 100% green electricity and the offsetting of unavoidable production-related emissions through Gold Standard projects.

Satino PureSoft

The new generation of recycling paper: Satino PureSoft.

Satino PureSoft is a raw material sensation: the new hygiene paper of the future in excellent quality for your sustainable washroom. 100% recycled – made from cardboard.

Satino PureSoft is unbleached, luxuriously soft, particularly absorbent and hygienically safe in all application areas – from hand towels and toilet paper to kitchen rolls and pocket and cosmetic tissues.

Satino PureSoft is the result of intensive research and advanced paper technology at WEPA – and a milestone in the development of environmentally friendly and high-quality fibres. Thanks to its innovative manufacturing process, Satino PureSoft is one of the softest natural-colour papers on the market.

80 %
lower ecological
fibre footprint*

* Compared to the current fresh fibres at WEPA. The calculation of the ecological footprint is carried out within the framework of a life cycle assessment.

Award-winning quality. Awards for Satino.

HYGINITY is awarded the German Design Award 2025 in the category “Excellent Product Design – Medical, Rehabilitation and Health Care”.

HYGINITY is awarded the 2024 European Product Design Award in the category “HOME (Household Products/Bathroom): Sanitary Equipment”.

bundespreis
ecodesign

According to the Federal Environment Agency, the biggest innovation in the paper segment in over a decade*:
Satino PureSoft has received the Federal Ecodesign Award 2023 in its product category – the highest accolade for ecological design in Germany.

reddot winner 2025

HYGINITY wins the Red Dot Award: Product Design 2025 awarded in the category “Bathroom and Sanitary Equipment” (subcategory “Bathroom Accessories”).

An award with Europe-wide acclaim:
Satino received the European Cleaning & Hygiene Award 2024 in the category “Sustainability – Best Practice (Manufacturer)”. This sets a benchmark for the entire industry – also thanks to Satino PureSoft.

at the Federal Ministry for the Environment

Responsible sustainability.

Our path as a forward-looking family business.

Since its founding in 1948, the WEPA Group has been a family business with a clear focus on sustainability. The concept of sustainability is firmly embedded in our corporate culture and forms an integral part of our corporate strategy. This is also reflected in various environmental labels.

With a holistic approach, we harmonise economic, ecological and social aspects and ensure transparency in our business activities as well as throughout the entire value chain. We are aware today of the impact our actions have on the world of tomorrow and take responsibility - for our future and that of coming generations. In doing so, we go beyond compliance with legal requirements. Our business activities are guided by our ethical values and standards. Sustainability is the foundation of all our business activities and investments, and thus the crucial prerequisite for achieving our ambitious sustainability goals. More information can be found in WEPA's sustainability reports.

Learn more about sustainability at WEPA

Our vision for sustainable packaging.

With the circular economy as a central guiding principle, we are consistently advancing our packaging strategy. In the short term, we focus on optimising plastic packaging by reducing material usage and increasing the proportion of recycled plastic. Our long-term goal: fibre-based packaging made from 100% recycled fibre. By avoiding plastics, we minimise environmental impact and rely on materials that pose the least risk of soil and ocean pollution – while also demonstrating excellent recyclability.

Our certifications

A plus for the environment, a plus for your sales – for example, in public procurement tenders.

- **FSC®-C016151 and PEFC/04-32-0775:**
for all WEPA locations as well as for pulp- and recycled products. Only items marked with FSC® are truly certified.
- **Blue Angel:**
for selected products made from recycled fibres
- **EU-Ecolabel:**
for our pulp and recycled qualities
- **ISO 9001, ISO 14001 and ISO 50001:**
all European WEPA production sites
- **Certification according to IFS Household and Care:**
selected WEPA locations
- **Cradle to Cradle**

Easy operation. Attractive design.

Design meets performance and user-friendliness: the HYGINITY dispenser range sets new standards in terms of functionality – and is the sustainable solution for maximum hygiene demands*. HYGINITY dispensers are available in black and white, suitable for any washroom ambiance.

The innovation with users in mind

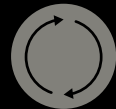

Developed by leading designers and microbiologists, the HYGINITY dispenser range sets new standards in the hygiene industry and places people at the centre. It stands for revolutionary simplicity and cleanliness, benefiting everyone – from wholesalers and service personnel to decision-makers and end-users. The series focuses on intuitive design, leading to user-friendly, time-saving and easy-to-install solutions for washrooms.

For sustainable washroom solutions

From private offices to large public facilities – the HYGINITY dispenser range focuses on sustainability for every requirement. A high proportion of recycled ABS and recyclability are just as important as consumption down to the last sheet. HYGINITY is the hygiene solution from Satino – more flexible and easier to use than ever.

* Accenture Industry X Consumer Study 2024

The advantages: this is what HYGINITY stands for.

100%
recyclable

Robust, shock-resistant, and
hygienic: easy to clean

Delivered in a robust,
shipping-friendly box

Made of durable ABS plastic,
in black from recycled ABS

Temperature resistant
to approx. 95°C

Lockable/configurable
locking system

In black and white

Illustrated, self-explanatory
instruction manual

Flexible installation
with mounting plate

All product highlights at a glance.

01

Easy operation

Designed for easy and intuitive use
by users, maintenance personnel
and installers.

02

Sustainability

Designed for high durability
and more efficient dosing. This
conserves valuable resources.

03

Hygiene

Developed in collaboration with
microbiologists to ensure a high
level of safe hygiene.

04

Intuitive design

One of the most aesthetically pleasing
designs in Europe, designed to
enhance any washroom.

05

Circumferential level indicator

Improved display of the fill level through a
circumferential transparent window and
easier visual inspection.

06

Smart-ready

The dispensers can be retrofitted with
sensors to be future-proof and digitally
connected.

satino

reddot winner 2025

Easy handling.

Quick installation, flexible assembly and easy refilling.

Rapid, precise fastening thanks to the uniform Satino with integrated level – and backward compatible with pre-installed mounting plates. With the new click system, HYGINITY dispensers can be easily snapped into the mounting plate without tools.

Flexible positioning: dispensers can be optimally opened upwards, downwards or sideways depending on accessibility and handling. The modular design and spare parts availability simplify repairs, thus mitigating the effects of vandalism.

01

02

The functions – simple and intuitive.

01 Easy recognition of fill level

Improved fill level display through a continuously transparent window and easier visibility.

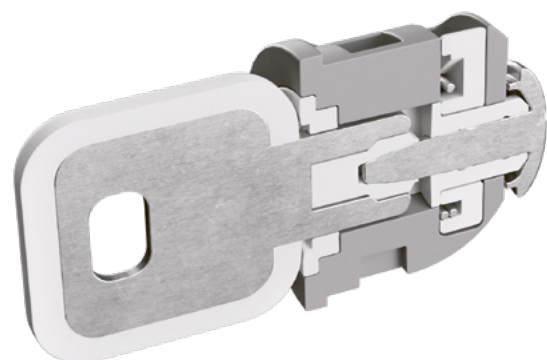

02 Effortless opening with soft-opening technology

Optimal opening, either upwards or downwards depending on the dispenser – for more flexible placement in restrooms. The integrated door stopper and soft-opening facilitate the refilling of hygiene paper.

03 & 04 The 3-option lock

Maximum flexibility with minimal effort: the innovative 3-option lock from Satino HYGINITY combines comfort, security and ease of use in one system. All dispensers can be opened with a uniform HYGINITY key – quickly and without key chaos. To close, simply press the cover and the dispenser locks automatically.

03

04

The plus for hand hygiene: paper towels from Satino.

Water, soap, and paper towels: the trio for effective, everyday hand hygiene. After all, drying hands after washing is essential – not least because any remaining germs can thrive and multiply on damp hands.

There are many reasons in favour of paper towels.

A survey found:

Paper towels are the most popular method for drying hands.*

Studies show:

Paper towels are the most hygienic way to dry hands, because paper towels come clean from the dispenser and are used individually and only once. Germs that may still be on damp hands are removed through the friction during drying; in contrast, air dryers distribute remaining microorganisms from the hands into the air and onto surfaces.

Practice shows:

Paper towels are versatile. When needed, they can be used to turn off taps, grip door handles or simply soak up spilled liquids. In any case, they ultimately end up in waste bins and are then disposed of professionally.

Paper towel rolls

SYS1 compatible

Sensor paper towel dispenser

For touchless towel dispensing. Individually adjustable pause intervals and sheet lengths from 20 to 34 cm reduce consumption and operating costs in the long term. The Paper feed is either automatic or on demand. Both dispensers feature a roll remainder function. They are also quieter and more energy-efficient.

Dispenser pre-filled & immediately ready for use

Towel dispenser made of cardboard and solid board.

PT2 compatible

- Filled with 360 sheets of Satino HiCycle towel paper W-fold, EU Ecolabel certified. For approximately 180 hand dryings. The narrow dispenser opens from the front and can be refilled multiple times. When the paper in the dispenser is empty, simply refill with our HiCycle and PureSoft products.
- An ideal addition to washrooms and everywhere with a short-term need for more hand hygiene, for example hotels, restaurants, sports festivals, tournaments, trade fairs, street festivals... and more besides.
- Can be attached using rear adhesive tape, screws or cord – drill holes already provided.

Brown towel dispenser

The quick solution made of cardboard – for flexible use at home, at events of any size and wherever towel paper is needed.

Frequency/Consumption   

Item No.	332850
Dimensions	240 (W) × 370 (H) × 88 (D) mm
Colour	Brown
Pack Unit	6 × 1
Pallet	32
Promotiondisplay	117

Versatile and simple: Hygiene in a box.

When the demand for hand hygiene increases suddenly, recyclable paper towel dispensers from Satino offer a simple and sustainable solution – whether in public spaces, companies, schools or at events.

The ready-to-use dispensers made of cardboard are environmentally friendly, can be mounted flexibly, and are ideal as a mobile addition or temporary extension to existing washroom solutions. They can be attached using adhesive tape or screws; suitable drill holes are already prepared and compatible with classic Satino dispenser systems.

In combination with suitable paper towels made from 100% recycled material, they ensure reliable hygiene and impressive cleaning results.

HiLine Premium cleaning rolls

CR1 compatible

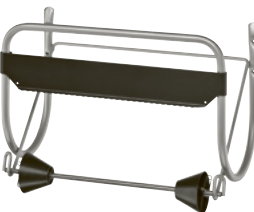

The redesigned Satino HiLine cleaning rolls impress with improved water absorption and reduced dust behaviour. With a 43% increase in strength and 15% more water absorption compared to previous cleaning rolls, they are now even longer-lasting, safer and more efficient.

Cleaning roll stand, floor

The mobile cleaning roll stand with an integrated, practical trash bag holder for disposing of used paper.

Frequency/Consumption	  
Item No.	332370
Dimensions	460 (W) × 940 (H) × 420 (D) mm
Colour	Aluminium/Black
Pack Unit	1
Pallet	50

Cleaning roll stand, wall

The solution for fixed location assembly – easy, safe roll-off behaviour.

Frequency/Consumption	  
Item No.	332380
Dimensions	455 (W) × 310 (H) × 240 (D) mm
Colour	Aluminium/Black
Pack Unit	1
Pallet	48

Satino HiLine cleaning rolls

Excellent cleaning results thanks to high absorbency and strength in 100% cellulose quality. EU-Ecolabel certified.

The professional multi-purpose cloth in the box.

Wherever hygiene papers need to be readily available for use, e.g.:

- For hand drying as hand towel paper
- For surface cleaning and wiping up liquids
- As a hygiene mat and substitute for napkins or kitchen rolls
- Self-opening – and readily available with one hand
- Practical two-stage opening perforation for optimal sheet dispensing
- Decorative, 100% recyclable design box – can be easily disposed of in paper waste after use
- Especially soft, absorbent premium quality in two or three layers
- FSC® Mix certified cellulose, EU Ecolabel certified
- Suitable for direct contact with food*

Go online with Satino!

Information and tools that make your work easier

At www.satino.com you can find information and services related to the entire Satino product range in five languages. Each item has product data sheets and user manuals, as well as high-quality product images that you can use for your own marketing activities.

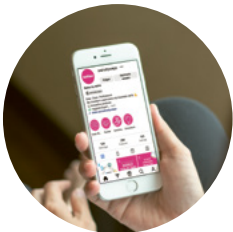

You can save products that interest you using the bookmark function and then download the corresponding data sheets as PDF files. With the practical coding, not only is online searching easy; it also allows you to immediately see which products belong together – for example, dispensers and paper towels or toilet papers.

News and interesting facts – online and in your inbox

Interested in innovations from the company and interesting facts from the world of hygiene? All of this is offered by our blog “Current News.” And if you want to comfortably stay informed about hygiene topics, simply subscribe to our newsletter:

Certifications*

The ISO standards 14001 for environmental management and ISO 50001 for energy management are integral parts of our management system. The quality management standard ISO 9001 and the globally recognised standard for raw material procurement from sustainable forest management, FSC® (Forest Stewardship Council®) are also complied with. Furthermore, almost all Satino products are certified with the EU Ecolabel and Blue Angel from the Federal Environment Agency.

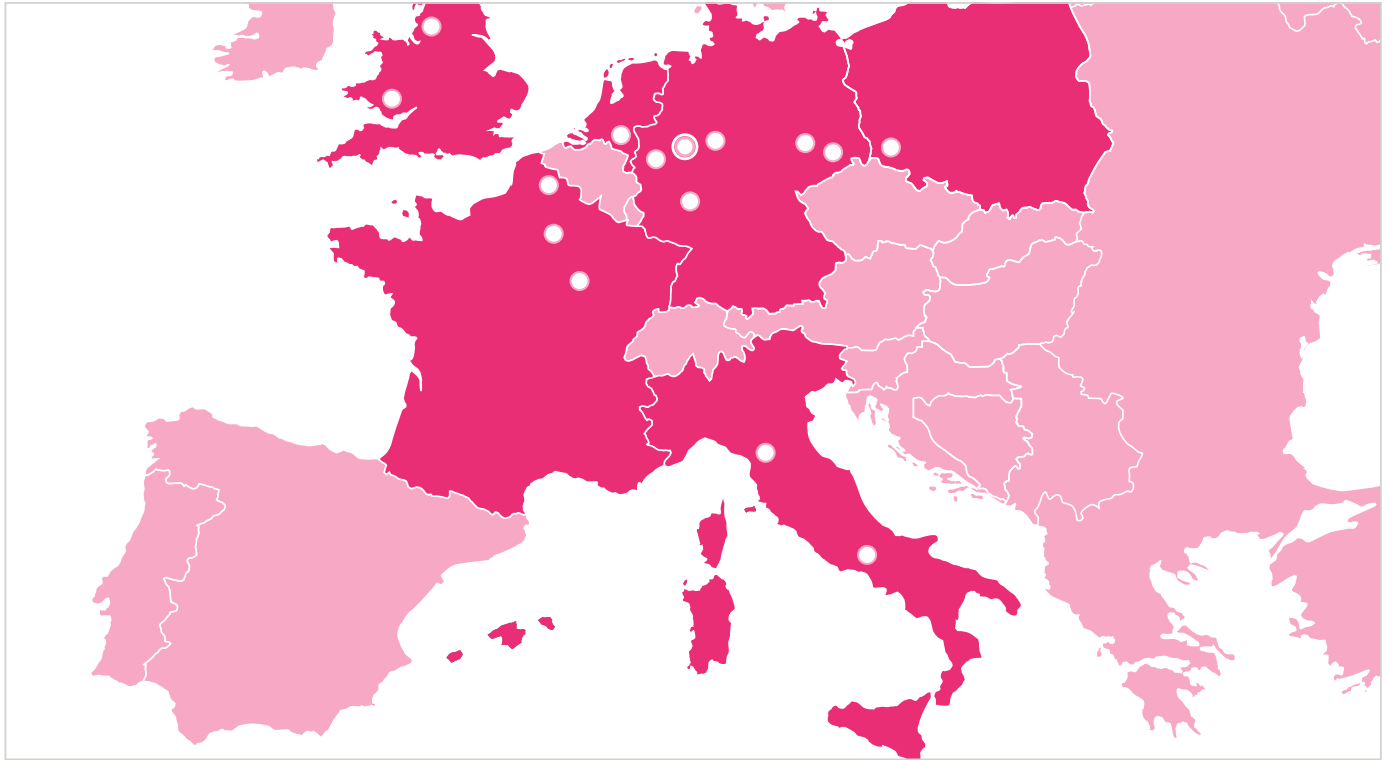

The IFS HPC certification stands for certified product quality and safety for household and personal care products.

WEPA Professional

WEPA Professional is a hygiene specialist operating throughout Europe, providing comprehensive washroom solutions.

With the Satino brand, the company specifically addresses the needs of businesses and public institutions. The portfolio ranges from hygiene papers to soaps and sanitiser solutions, as well as intelligent dispensing systems, air fresheners, suitable accessories and complementary services. All products and systems are designed to make hygiene safe, comfortable and intuitively experienced-while meeting the highest standards of quality, cost-effectiveness and sustainability. This results in modern washroom concepts that combine functionality and responsibility. As part of the WEPA Group, WEPA Professional is one of the leading European manufacturers of hygiene papers. The corporate group, headquartered in Arnsberg (North Rhine Westphalia, Germany), is among the three largest hygiene paper manufacturers in Europe and is a market leader in the production of hygiene papers made from recycled fibres.
