

sabino wepa PureSoft

The hygiene paper
of the future

Award-Winning Quality

According to the Federal Environment Agency, the biggest innovation in the paper segment in more than a decade:*

Satino PureSoft was awarded the German Ecodesign Award 2023 in the product category – the highest accolade for ecological design in Germany.

An award with Europe-wide appeal:

Satino was honoured with the European Cleaning and Hygiene Award 2024 in the ‘Sustainability – Best Practice’ (Manufacturer) category. With this, we are setting a benchmark for the entire industry – thanks to Satino PureSoft.

* Dr. Bettina Hoffmann, former Parliamentary State Secretary at the German Federal Ministry for the Environment

The new generation of recycled paper: Satino PureSoft

Satino PureSoft is a sensation in the use of raw materials: the new new high-quality toilet paper of the future for your sustainable washroom. 100% recycled – made from cardboard.

Satino PureSoft is unbleached, luxuriously soft, particularly absorbent and hygienically safe in all applications – from towel and toilet paper to kitchen roll to handkerchiefs and facial tissues.

Satino PureSoft is the result of intensive research and advanced paper technology at WEPA – and a milestone in the development of environmentally friendly fibres. Thanks to its innovative manufacturing process, Satino PureSoft is one of the softest natural coloured papers on the market.

Unbeatable softness and sustainability

Satino PureSoft: the particularly sustainable and skin-friendly recycled paper in high quality – as good as hygiene paper made from virgin fibre.

100%

recycled – made from cardboard

100%

unbleached and therefore instantly recognisable as sustainable

Easy to dissolve

This is how Satino PureSoft prevents pipe blockages and relieves the strain on the sanitary infrastructure.

Environmentally friendly packaging thanks to 60% less fresh plastic

This is how Satino PureSoft reduces environmental pollution and preserves valuable raw materials.

100%

soft, absorbent and high quality

100%

hygienic and safe in all applications

A raw material innovation for the future

Cardboard is turned into 100% recycled and high-quality hygiene paper:

with Satino PureSoft we tap into recovered paper qualities that previously could not be used in tissue products. Satino PureSoft thus marks a new level of sustainability. The raw material for Satino PureSoft has a 80% smaller ecological fiber footprint compared to virgin woodbased fibers.*

“Through advanced technologies, we convert used fibres from cardboard and packaging into high-quality hygiene paper. This keeps valuable fibres in the material cycle.”

Stefan Gräter, Head of Sustainability WEPA

* Compared to the quadruple fibres currently used by WEPA. Based on the scientific LCA method of Ecological Scarcity 2021 benchmarking average WEPA data of 2023 reviewed by Carbotech (using different methodologies may lead to different results).

CURRENT FIBRE CASCADE

In Europe, the majority of hygiene papers are made of virgin wood-based fibres.

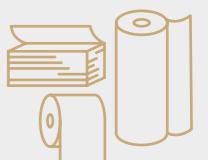

Virgin fibre products

SATINO PURESOFT FIBRE CASCADE

Cascaded use of fibres ensures resources are used to their full potential.

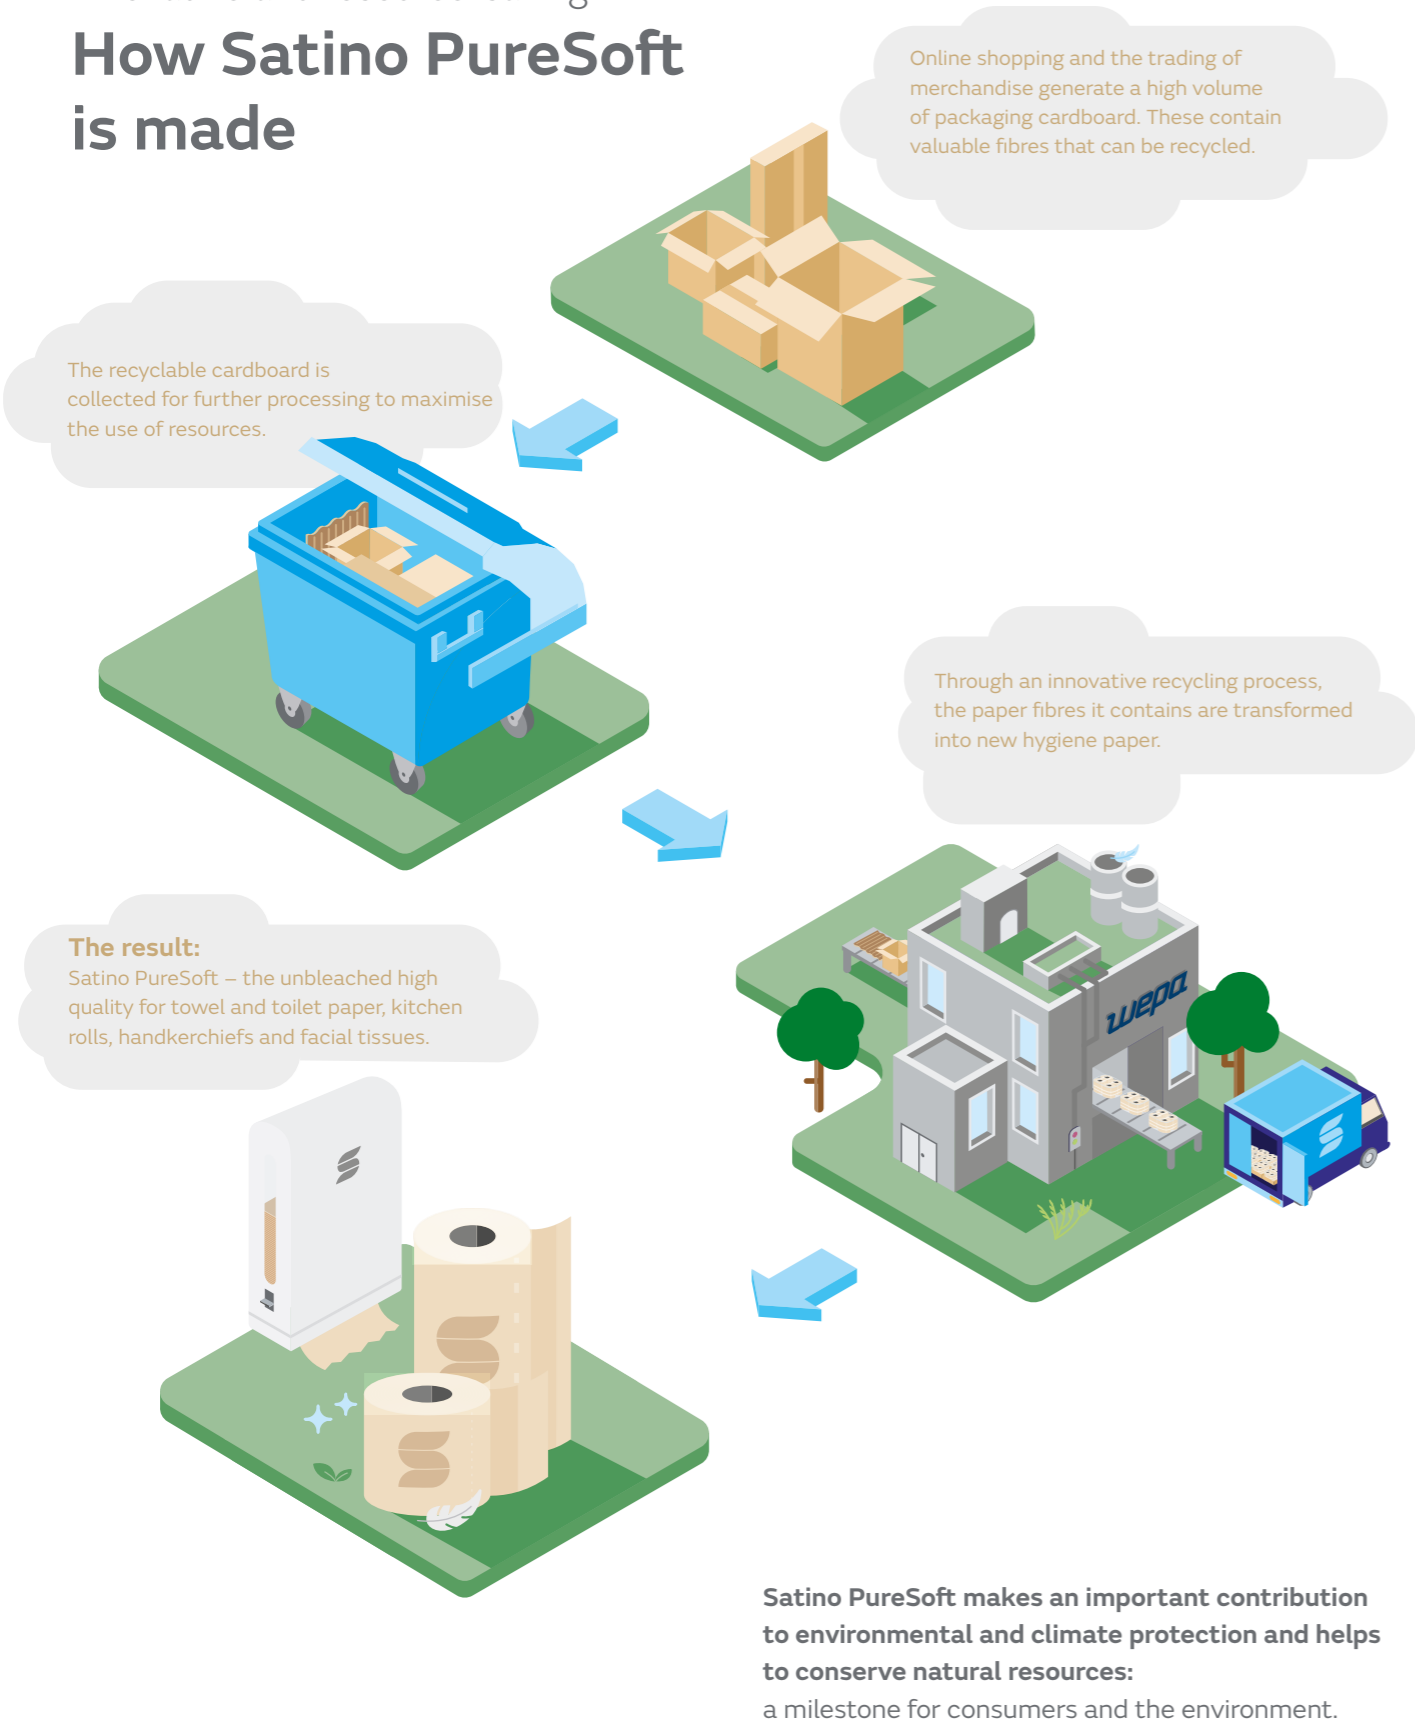

Established recycling loops

Satino PureSoft products

Innovative and resource-saving:
How Satino PureSoft is made

Visibly sustainable and noticeably soft:
Satino PureSoft is popular with consumers

With its high quality, Satino PureSoft distinctly rebuts the belief that recycled paper is hard, uncomfortable or even inferior. Extensive consumer tests confirm this.*

“Noticeably soft paper with a natural colour – that’s really unique!”

89%

praised the sustainable concept and especially the aspect of resource-saving production without the use of bleaching agents.

84%

rated Satino PureSoft as being very soft.

80%

said they liked the product.

78%

liked the natural colour, which at first glance identifies Satino PureSoft as an ecological product.

* IPSOS Consumer Study PIU 2021

SUSTAINABLE PACKAGING SOLUTIONS

100%
recyclable

Smaller ecological footprint

Satino PureSoft comes in resource-saving foil packaging for optimal handling, protected transport and safe storage.

The foil is produced from 60% recycled PCR (post consumer recyclate) and is 100% recyclable.

The ecological footprint of this foil: more than 65% smaller than comparable cardboard packaging.

Future-oriented quality for all applications

The environmentally friendly and soft Satino PureSoft is available as towel and toilet paper, as kitchen roll and as tissue and facial tissue.
